

NEWSLETTER #12 - JULY 2022

SUMMARY

P. 02
Students from La Salle
Thillois High School visit the
CEBB.
New shooting at ARD.

P. 03
Discovering the research
world!
A fully booked day.

P. 04
French university diploma in
process.
The bioeconomy fresk.

P. 05
Photo competition.
The biosourced exhibition is
expanding.

P. 06
Create your biorefinery.
Bioéco Olympiads
preparation for the Châlons
fair.

P. 07
Our future actions.
The CMQ is hiring.

Our objectives

- **Raise awareness** and **foster bioeconomy** to encourage an active and positive orientation of young people.
- **Develop ambition** and encouraging higher levels of qualification.
- **Improve** professional integration.

In order to communicate on the actions implemented by CMQ, a newsletter will be sent several times in the year to the partners of this Campus. Do not hesitate to distribute it to people who might be interested.

Students from La Salle Thillois High School at the CEBB

Call for projects - May 25th, 2022

As part of the response of our call for projects 2022, about thirty students of 2nd and last year of Laboratory Quality Control (LCQ) and thirty students of the 1st year of BTS Anabiotec from the La Salle Thillois High School visited the European Center of Biotechnology and Bioeconomy (CEBB). They participated to animations proposed by the CMQ such as the escape game *"The bioeconomy in danger"* and a mini conference on trainings / jobs related to the bioeconomy sector. This last one targeting senior students from LCQ and BTS Anabiotec. We would like to thank all the people working at CEBB, and especially Honorine Katir, for their warm welcome.

New shooting at ARD

Video Library- June 7th, 2022

We continue to add content to the CMQ video library! We went to ARD, a specialist in research and development in the fields of industrial biotechnology, fractionation and plant chemistry, with the objective to make an company's tour video. The film will show ARD's activities from the laboratory to the industrial pilot. A big thank you to Jérôme Morgado for his warm welcome and time.

Stay tuned, the video is coming soon !

Are you interested in the biotechnology sector and looking for a job?
ARD is hiring!

Discovering the research world!

Call for projects - June 14th, 2022

By participating at our call for collaborative projects, the Pontfaverger Middle School received funding for the transportation of its 6th grade students to URCA facilities, in order to observe the world of research. On the program the joy and good mood didn't miss. The students visited the RIBP laboratory (Resistance Induced and Bioprotection of Plants) and its greenhouses. They also participated in a conference explaining the job of a teacher-researcher.

**SEPTEMBER
2022**

Want to make discover the Bioeconomy?

Our next call for collaborative projects will be available in September 2022.

A fully booked day

Innovative trainings - June 20th, 2022

Discovering the bioeconomy while having fun! That's what we propose in our touring pack.

On June 20th, through an escape game, an exhibition of biobased objects, a quiz and a conference, 140 students of 4th grade from Gueux High School discovered the various actors and stakes of the bioeconomy.

We thank Séverine Hébert and the college of Gueux to have invited us and trusted us.

French university diploma in process

Innovative trainings June 20th 2022

With the support of our partners, we are finalizing the content of the different modules of the FSS University Diploma (DU) in Biotechnologies, Chemistry and Bioeconomy. It will be available at the beginning of the 2022 academic year. This one-year diploma includes mainly practical courses and a work-study program in a company. It is intended to be a direct access to employment, particularly for high school graduates.

We would like to thank all the people involved and working on the preparation of this DU.

People involved in the creation of this DU (named from left to right): Honorine KATIR (CEBB) / Estelle GARNIER (CMQ) / Laurent MARCHWANT (CFA CFC Groupe de La Salle) / Fabrice BOUCHER (Lycée La Salle Thillois) / Éric COUROT (RIBP) / Claire DUBRAC (Lycée Les Lombards) / Aline CABOUCO (Lycée Les Lombards) / Adem KARAASLAN (CMQ) / Laëtitia ANDRE (UIMM)

The bioeconomy fresk, a new animation in the making!

Innovative trainings - July 1st, 2022

Since few months and inspired by the climate fresk, we have been working with the REGARDS laboratory of URCA and Romain Debref on the conception of a "Bioeconomy Fresk". On Friday July 1st, we invited our partners: the AEBB pole of URCA, the CEBB and Accustica to test it for the very first time.

Based on a systemic approach, it aims to put into perspective in a playful way the place of the bioeconomy in our society. We will start to propose it from september, as the form of an animation (about 30 minutes), at the Châlons Fair 2022 as well as to the region's educational institutions.

The shoots of our photo contest

Cultural opening - July 6th, 2022

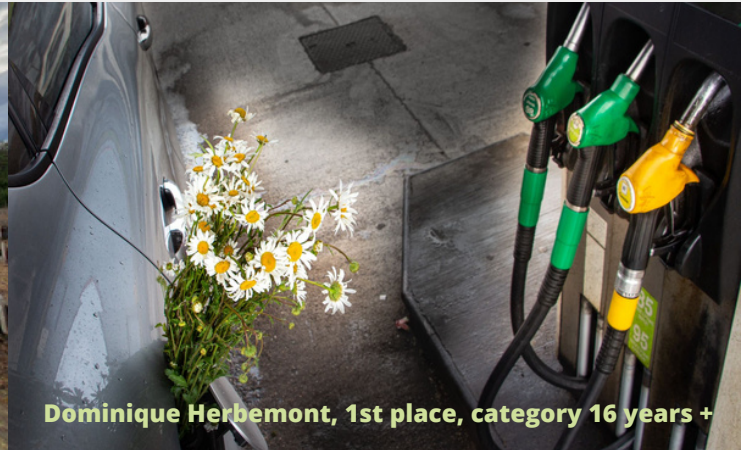

On Wednesday July 6th, the award ceremony of our photo contest "The bioeconomy in pictures" took place with the theme "The bioeconomy, its markets and outlets". This year, 23 participants sent us their most beautiful pictures. We warmly thank them for their participation and congratulate the winners of this 3rd edition.

Prepare your cameras! Next edition in spring.

Amaury Sabotin, 1st place category -16 years

Dominique Herbemont, 1st place, category 16 years +

The biosourced exhibition is expanding.

Innovative mediation

We are very pleased to announce that two new biobased objects, in partnership with Le Coq Sportif and Just Green, have joined our touring exhibition: "The Everyday Bioeconomy". A big thank you to these companies who entrust us with their products to make them discoverable to the students and to allow them to concretize what the bioeconomy is in everyday life.

GAIA sneakers
(Le Coq Sportif)

Made from plants, the upper of these sneakers is made of grapes, its laces are made of cotton, its outsole is made of rubber while its insole is made of cork and natural latex.

Phone case
(Just Green)

100% biodegradable and compostable, this case is made out of rice, corn, soy, carrots, onions and bamboo.

First test of our game: "Create your biorefinery"

Innovative trainings - July 4th, 2022

Just out of the 3D printers of the EISINE Fablab, the game "Create your biorefinery" is a serious game of discovery, consisting in reconstruct the model of the Bazancourt Pomacle site. Imagined by the students of the 1st year of bachelor's degree CM1 and developed by us. This dynamic and collaborative game makes possible to highlight the use of the vegetable biomass, the management of the resources, the synergy between the companies of the site, the concept of ecological transition and the advantages of the short circuits.

Our game was tested for the first time by 3rd grade students from the Mont d'Hor Middle School in Saint-Thierry. We would like to thank our partners, the AEBB pole of URCA, the CEBB and Accustica, as well as the students and teachers present for their participation and feedback.

The Bioeconomy Olympiads are getting ready for the Châlons fair 2022

Innovative trainings - July 4th 2022

One of our main objectives for the fair is to get students to discover the bioeconomy during one day!

After several meetings, we decided that these olympiads would be a great opportunity to carry out a succession of events in the form of games and direct interactions with different actors of the bioeconomy. The learners coming from various horizons will form mixed teams (URCA students, Marne High School students, and Belgian learners). The team with the most points will win a prize!

We already wish them good luck!

The French version of the book "What's bioeconomy ?" has finally arrived. A great pride for the CMQ team! This book is intended for children from 5 to 8 years old to explain in a simple and playful way what bioeconomy is. A real plus for our interventions in schools.

Our future actions

Team building

15/07/2022

There is nothing like visiting exhibitions to find inspiration for future events and to strengthen the bonds of our team. For this team building, we will be present at the "Cité des Sciences et de l'Industrie" in Paris to visit the exhibition: "Bio-inspired".

Internship Price

Until 31/08/2022

Are you doing an internship in the field of bioeconomy? Do not hesitate to apply to our contest by making a 180s video summarizing it. The winners will receive a check of 300 euros.

Châlons Fair 2022

From 06/09/2022 to 09/09/2022

We are honored to be present this year at the Châlons fair, over several days and on several stands, in order to present the trades related to bioeconomy but also to animate olympiads.

Call for projects

Want to make discover the bioeconomy? In September, we will open to the public our call for projects.
