# SUMMER SCHOOL 2019

In collaboration with Pamir International Conference  
Reims Champagne-Ardenne University  
and Grenoble Alpes University

# Program

	9:00-9:45	9:45-10:30	10:30-11:15		11:45-12:30	12:30-13:15
JULY 2: Fundamental MHD	<b>Y. Fautrelle:</b> Introduction to magneto sciences and effect of AC Magnetic Fields on Free Surfaces	<b>S. Cuevas</b> Flows induced by electro magnetic forces	<b>L. Bühler</b> MHD duct flows		<b>A. Potherat</b> MHD Turbulence at low Magnetic Reynolds number	<b>L. Davoust:</b> "EHD: principles and applications".
JULY 3 Magneto electrochemistry/ liquid metal°	<b>J. P. Chopart</b> General presentation	<b>T. Wondrak°</b> Measurement Systems for liquid metals	<b>A.L. Daltin</b> Action of MF on the quality of deposition		<b>A. Alemany</b> Influence of a DC magnetic field on the corrosion processes of a metallic wall by a liquid metal	<b>A. Bouabdallah</b> Instability and Corrosion under magnetic field
JULY 4 EPM*/ <i>metal and Space technologies</i>	<b>A.Gagnoud*</b> EPM: General presentation	<b>A.Kharicha*</b> Continuous casting of steel	<b>A. Bojarević*</b> Some Applied Aspects of Thermoelectric Magnetohydrodynamics		<b>K. Zaidat*</b> Crystal growth under magnetic field	<b>C. Latge</b> The sodium, a fluid for various applications. Properties and consequences for its safe and efficient use
JULY 5 liquid metal and Space technologies	<b>O. Agullo</b> 9:00-9:40 MHD issues in tokamak plasmas. Focus on magnetic island dynamics	<b>Y. Delannoy</b> 9:40-10:20 Electromagnetic pumps: performance, instabilities, PEMDYN test experiment	<b>F. Debray</b> 10:20-11:00 High magnetic fields laboratory		<b>E. Pariat</b> 11:45-12:25 Solar Magnetic Fields: from structuring to dynamically impacting the interplanetary medium	<b>A. Montisci</b> 12:25-13:05 Solar sails
