

## ELSEVIER AND PLANT BIOPROTECH 2017

Invite you to submit your presentation at the First International Symposium on Plant Protection and Technologies (**Plant Bioprotech 2017**) to an appropriate journal published by **Elsevier**. After peer review and acceptance, all articles will be combined in a virtual special issue,

### *The Plant Bioprotech Virtual Special Issue*

Authors - either presenting an oral communication or a poster at Plant Bioprotech 2017- can submit an article (regular article, research note or review) to any Elsevier Journal. If accepted, it will be linked to the virtual special issue devoted to Plant Bioprotech 2017. In their cover letter, authors have to mention that their manuscript is intended for the **Plant Bioprotech Virtual Special Issue**. All manuscripts will be subjected to the mandatory selection process for the journal of their choice, including the strict peer review procedure. Therefore acceptance for presentation at the Symposium is not a guarantee for publication.

Accepted papers will be published individually in regular issues as soon as they are accepted. Footnotes will indicate they were presented, at Plant Bioprotech 2017 and are the source for selection and linking to the virtual special issue.

To ensure inclusion in the virtual issue, it is essential that details of your submission and journal choice are communicated to **Arun ALBRECHT**, Alrun.Albrecht@elsevier.com, the publisher responsible for plant science journals at Elsevier by completing the following registration details, *as far as your submission was accepted*.

\*\*\*\*\*

**PLANT BIOPROTECH 2017**  
**MANUSCRIPT REGISTRATION FOR VIRTUAL SPECIAL ISSUE**

Authors .....

Manuscript title .....

.....

*Accepted by journal* .....

Corresponding Author details

Name .....

Institution .....

.....

Phone .....

Email .....

**LAST DATE FOR SUBMISSION: 31 OCTOBER 2017**

**NOTE:**

The virtual special issue proposal is that *Elsevier* will publish accepted and published papers from any *Elsevier* journals in the virtual special issue devoted to the symposium. The virtual special issue will be hosted on the journal home page which will receive the bulk of the contributions but there will be links to all accepted papers in any journal on *Science Direct*. Authors have to keep Arun ALBRECHT, the Publisher responsible for plant science journals at Elsevier informed of their intention to have their work included in this virtual special issue. All submissions have to follow the instructions to authors of the selected journal. Peer-review is mandatory for all submissions and will follow the rules of the selected journal.
